## How to logon with Doorway Remote Client for Windows

Go to <http://client.doorway.no/> and press **Doorway remote desktop client**.

The first time you use Doorway RDS you will need to add a Remote desktop server. You can do this by pressing **Settings** down in the right corner.

Type in **rd.domain.no** – This address should be the same address you enter when logging on from web-browser.

Press **Add**.

Add or remove Remote desktop servers

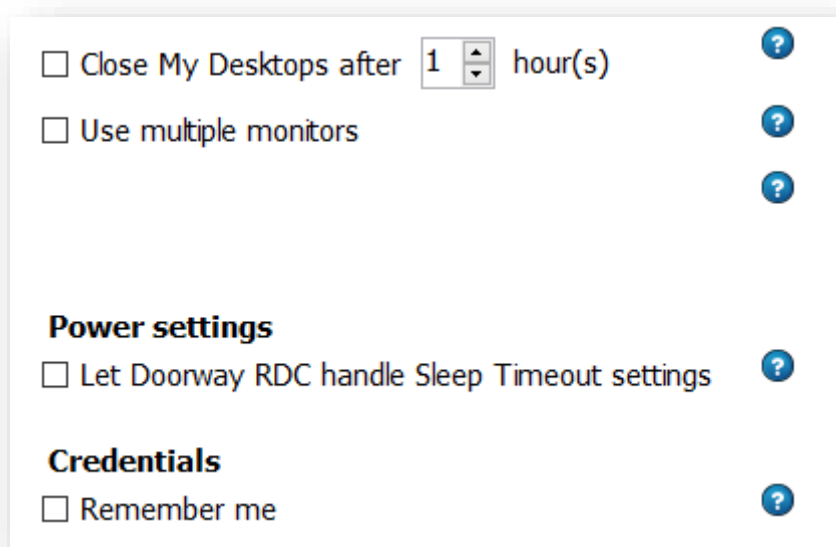

rd.domain.no

Add

Remove

In **settings** menu you can select that the Desktops should automatically close after some hours.

You should select "Use multiple monitors" **if** you want to use the Terminal Server on more than one screen

Select "Let Doorway RDC handle Sleep Timeout settings" **if** you don't want the pc to go into sleep mode while RDC is running.

If you select "Remember me" you will be automatically logged in every time you start RDC.

**You don't need to select anything in settings if you don't want to.**

To logon press **Main**. Here you type in username and password and double click the icon to logon.

(XXXXYY or first.last@domain.com)

Or:

(XXXXYY or first.last@domain.com)

My desktops at 'rd.doorway.no'.  
DoubleClick an Icon below to start a Remote Desktop Session.

Desktop

Doorway RD Client got some other functions that might be useful.

Under **Password** you can change your password. You can also reset your password if forgotten. If you reset your password you will receive new password on SMS.

Under **OS Info** you can see some information about the computer you are using. Here you can also find link to Lync VDI plugin if you wish to use Skype for Business on Terminal server.

If you press Services you can choose what is been shown to your left on Doorway RDS.

These are your options:

1. Doorway picture
2. Messages sent by Doorway
3. Overview with status on services by Doorway.

If you close or minimize Doorway RD Client you can find it again down in your right corner on your main screen.
